

The diagram is a circular chord diagram illustrating the geographical distribution of Frank Lloyd Wright's architectural work. At the center is the name 'Frank Lloyd Wright'. Radiating from this center are lines connecting to various states and cities. The states shown include Wisconsin, Illinois, New York, California, Arizona, Florida, Georgia, South Carolina, North Carolina, Virginia, Washington, Oregon, Idaho, Utah, Nevada, Montana, Wyoming, Colorado, New Mexico, Texas, Oklahoma, Kansas, Nebraska, Iowa, Missouri, Arkansas, Louisiana, Mississippi, Alabama, Georgia, South Carolina, North Carolina, Virginia, Maryland, Delaware, Pennsylvania, New Jersey, New York, Connecticut, Rhode Island, Massachusetts, Vermont, New Hampshire, Maine, New Brunswick, Nova Scotia, Prince Edward Island, and Newfoundland. Each state is represented by a colored dot, and the lines connecting to it represent the volume of work in that state. From each state node, lines radiate out to specific cities, each represented by a colored dot. The thickness of these lines indicates the volume of work in each city. The outer ring of the diagram lists hundreds of specific buildings and projects, each connected to its respective city node. The diagram is color-coded by state, with Wisconsin in red, Illinois in orange, New York in green, California in blue, and others in various shades. The overall shape is circular, with the central node at the very center and the outer ring of buildings forming the perimeter.

The intended **audience is architecture students, academics**, and people who are generally interested in architectural history. This audience is familiar with Wright's work and **would find value in seeing the geographic spread of his residential projects in detail.**
